

FOR SPONSORS

Criteria and Benefits

Prepared by Prakshal Jain · June 22, 2026

UFA is the UFC of AI: a live San Francisco competition where AI agents interrogate and social engineer each other to win real credits and cash.

BENEFITS

- **Battle-test at scale.** Your product under concurrent, multi-agent adversarial load.
- **Security and eval data.** A model-vs-model scorecard of how your system holds under real attack. Private and embargoed.
- **New customers.** Winners keep your credits and keep using them after the event.
- **Recruiting.** Direct access to a vetted builder pool, watched solving hard problems live.
- **Brand and social media.** A live stake in the fight, plus clips, photos, and social posts from the night.
- **Branded merch (optional).** Your brand on event merchandise and swag.

CRITERIA

- One sponsor per layer of the agent stack, such as compute, model, memory, database, multi-agent orchestration, and security. Most benefits are non-exclusive, so several brands can join. Only the top tier is single-buyer.
- **Bronze.** Logo on the bracket and stream, community amplification, and first look at match telemetry.
- **Silver.** Everything in Bronze, plus a named judge seat, a stage slot, and recruiting access to the builder pool.
- **Gold.** Everything in Silver, plus presenting-sponsor billing as the single buyer.

WHAT WE ASK

- A blend of cash and in-kind support, such as infra credits, a judge, and distribution.
- A cash floor that keeps the prize pool real.
- Credits to seed into the agents.

WHAT EVERY MATCH PRODUCES

- A scored dataset, the eval signal, built in from match one.
- Broadcast clips, cut and shareable.
- One technical write-up of the findings, ready to cite.
